

Medication history update

Recorded October 3, 2026 | Patient-reported; not clinically verified

Patient	Alex Morgan
Date of birth	1992-04-18
MRN	DEMO-12345
Email	alex.morgan@example.test
Phone	202-555-0148

New information

The patient reports taking cetirizine for seasonal allergy symptoms. Dose, frequency, and start date have not been recorded.

The patient reports drowsiness after taking cetirizine. This is a reported experience, not a confirmed drug reaction.

Existing history

Peanut allergy is reported; reaction details are not recorded. The patient reports difficulty swallowing large tablets.

An older record lists "Medication A" as a demo placeholder. It has not been reconciled with this update. A complete current medication list is unavailable.

Questions for the next review

Confirm the product, dose, timing, other medicines, and the reported drowsiness. Clarify allergy history and swallowing needs.
